Recreation Center Update:

- Drywall repairs are needed in the fitness center, the woman's restroom, and the pool maintenance room.
- The new computer has been installed and the cameras are once again visible.
- The pool repair proposals are in place and work is pending scheduling.
- We have not made any progress with upgrading the internet at the Rec Center. It seems most local providers do not provide business service in the area.
 - Comcast (current provider) services can be adjusted and by eliminating the primary tv coverage, we can increase our speed while keeping the monthly contract price approximately the same.
 - Lumen has options for offering a hot-spot at the Rec Center for guest use, but a
 proposal requires additional information. Eric will speak with them to nail down
 the service options.
 - o CenturyLink, Quantum, and Ting do not provide business service in the area.
- Facilities Manager job description is in process of being updated to better reflect our expectation.
- Periodic reviews are needed for the Rec Center Staff!

Website Updates:

• Recent changes by the Colorado Legislature have installed requirements for public entities to meet certain website accessibility benchmarks. WSDM is in the process of reviewing each page, link, document, and widget to ensure your District meets the mark.

Landscape Maintenance Status/ Review:

• Spring clean-up is underway.

• Revisions to the Landscape Plan to reduce the number of trees required are still in the process of being reviewed by the City.

Park and Trail Updates:

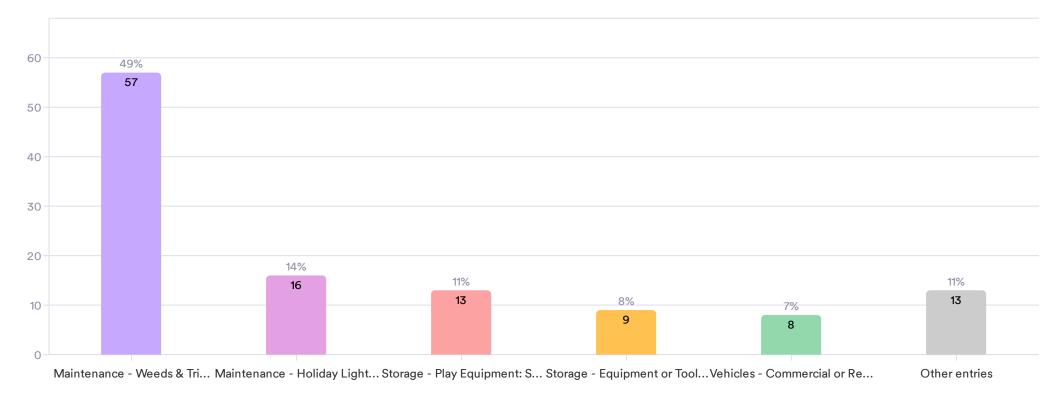

• The park playground has been inspected and the inspection record has been added as attachment to this report. There are a number of repairs needed and RMP is working to obtain pricing for parts to provide a proposal for repairs.

Priority Hazards designated in red: 1) Could result in death or serious injury and needs to be dealt with immediately, 2) Could result in minor injury and should be corrected when time permits, 3) Is compliant but has been noted as an eventual potential risk.

Site Inspection Items	Yes	No	N/A	Inspection & Repair Comments
Play area is free of vandalism (damage, graffiti, burns, etc.)		×		A number of gashes in the plastic panels throughout the playground. This may expose users to sharp points (CPSC 3.4)(Priority 3 Hazard - All scratches hit with a torch to smooth out sharp edges by Keith Kroening on 3/23/2024) A number of gashes in the plastic panels throughout the playground. This may expose users to sharp points (CPSC 3.4)(Priority 3 Hazard - All scratches hit with a torch to smooth out sharp edges by Keith Kroening on 3/23/2024)

		Marking on barriers. Attempted to remove but the markings are still slightly visible. Recommend bringing out a professional graffiti removal company (No Priority Hazard)
No poor drainage areas No obstruction of play area	X	The EWF is holding a lot of water, and I was unable to determine where the daylight for the drainage is. You may want to refer to previous design documents and determine if drainage was actually installed. If it was, it may be blocked up or damaged (as there were a number of vehicle tire tracks where I would assume the drain would run sub-surface). You may have to hire a company to clear out your drainage to work adequately. Again, we may want to wait for time from the last snow to determine whether it is draining regularly (ASTM-F2075)(Priority 2 Hazard)

Concrete footers are below fall material and not exposed		×		The concrete footers for the spring riders are all exposed. It appears that the spring riders may have been installed about 6 to 8" too high. These footers are creating trip hazards and hard surfacing if children were to fall off. Recommend removal of spring riders, or pulling them out and setting them at correct depths (CPSC 2.6)(Priority 1 Hazard)

Swing seats are in good condition, unbroken and no exposed metal (no cuts, cracks, or missing seats)		X		 Internal metal of the bucket seats have worn and has deformed. When it does this, there is a potential for children to get stuck in the swing seats. Recommend replacement of both bucket seats (CSPC 2.5.1)(Priority 3 Hazard)

Additional Items Playground Installed at Correctly	Yes	X	N/A	Inspection/Repair Comments I believe that when this playground was installed, I'm assuming that the developer did not convey the correct finished grade for the equipment to sit. Due to this, as soon as the EWF is below the concrete line, it is no longer compliant. This is creating issues with ADA accessibility, depth of footers for spring riders, slide exits being too high, and level stickers showing on all equipment. No recommendation as this should have been addressed during installation or in a playground "Audit" before ownership was transferred (Multiple Compliance Issues)(Priority 1 Hazard) During the design process it should
				have been addressed that a

		playground should not be located in a 100 year flood area. Due to the poor decision on this part, the playground now has a lot of water moving through the materials. This will break down the EWF quickly and it may need to be replaced completely every couple of years to prevent complete decomposition and molding of the EWF. No recommendation as this should have been addressed during the design/development phase of the project (ASTM-F2075)(Priority 2 Hazard)
Swing mats for belt swings	X	A standard that I recommend, especially if there is not regular monthly maintenance occuring at the playgrounds, is to install swing mats under the belt swings. Adding these mats will prevent the displacement of

		EWF and maintain a proper impact attenuating surface.

WSDM, LLC and Eric Farrar is Signed and Filed!

Hey Heather,

Thank you for reaching out!!!!

I will begin to work on the quote for the parts that you requested. It usually takes about a week before the distributor gets me a quote back.

As for the playground in the retention basin. I know there are a number of playgrounds that designers and developers are trying to utilize these blank spaces, but they are not doing it well in my experience. The reason I say this, is that the Engineered Wood Fiber (the wood chips), is not meant to be saturated for long periods of time, or else the decomposition period will accelerate (this also causes molds to form, which can be annoxic to the users). The holding of water will also accelerate the breakdown of metals and concrete footers. This high water table will more than likely carry away the safety surfacing as well, as it is very porous. With your specific playground it is hard to tell the time frame for drainage on this, as I know we just had storms recently, but I did visit a number of other sites last week where they had drained over a short period of time and the EWF was completely dry. In conclusion, I would always reject the design of having a play area for children in an area meant to retain water, but if this was the intention, to have it more elevated than the other areas, as to have this be the first area to drain. If the developers are dead set on putting a playground on a retention basis, I would have been very diligent on the installation and design of the drainage as well as choosing a different safety surfacing that may hold up to the impacts of water a little better, such as PIP.

At this point, my recommendation would be to continue inspection and assess needs for drainage and surfacing as needed going forward.

I hope this information helps and please do not hesitate to ask any other questions you may have!!!!

Good Morning,

Thank you for the inspection report. Will you please provide an itemized proposal for the replacement of each damaged or worn part and missing hardware?

Just a note on the grading and drainage, this playground sits at the bottom of an active retention basin and is intended to flood. We have seen up-to 4-feet of water pooled in the area during heavy rains and it is intended to drain slowly out of a outlet located about 60 yards to the southwest of the playground. Does that change your perspective on any of the grading and drainage issues?

response from District

Heather,

Thank you for taking some time to speak with Todd Evans, Deputy City Manager and myself yesterday regarding the City's requirement for a landscape maintenance agreement for the landscaped area within the public rights-of-way (ROW). As we discussed, this is a requirement that is being imposed on all developments that have any landscaping or landscape materials within the ROW. When metro districts or HOAs are in place, the City is requiring these entities to maintain these areas to ensure that the long-term maintenance is addressed.

If you have any other questions please let me know.

Thank you,
